

haut de l'arbre

arbre

sol

rayon à 52°

rayon à 30°

12.00 m

The diagram shows a vertical line representing a tree on a horizontal line representing the ground. Two dashed lines representing sun rays originate from the top of the tree. The ray closer to the tree is labeled 'rayon à 52°' and the ray further away is labeled 'rayon à 30°'. A horizontal double-headed arrow below the ground line indicates a distance of 12.00 m between the base of the tree and the point where the 30° ray hits the ground. The labels 'haut de l'arbre' and 'arbre' are on the left, and 'sol' is at the bottom left.
